**COMMERCIAL
ANALYTICS FOR TIVA'S
SALES, MARKETING &
CUSTOMER DECISIONS**

SALES PRODUCT & INVENTORY CAMPAIGN CUSTOMER & MARKET 2025

FASHION COMMERCE

BUSINESS CONTEXT

TIVA is a premium fashion brand — average order value around \$358 — selling online across Spain, Portugal, the Netherlands, Italy, Germany, and France. Over the period it did roughly \$324,000 in revenue and about 900 orders. Growth is now coming from paid campaigns and promotions rather than pure organic demand, and management has the numbers scattered across spreadsheets with no single view.

1.

LIMITED VISIBILITY INTO CAMPAIGN ROI

The brand can see campaign activity, but cannot clearly identify which campaigns generate enough revenue and profit to justify the spend.

2.

NO MARKET-SPECIFIC COMMERCIAL STRATEGY

The brand applies the same commercial approach across six European markets despite meaningful differences in customer value, loyalty, and purchasing behaviour.

3.

HEAVY DISCOUNTING, UNCLEAR CUSTOMER VALUE

The brand is discounting heavily without knowing whether it is attracting loyal, high-value customers or one-time bargain hunters.

DATA METHODOLOGY

DATA PROFILING	checked keys, missing values, duplicates, ranges, and table relationships
DATA CLEANING	standardized dates, discounts, prices, and categorical fields in Python
DATA VALIDATION	reconciled sales totals and verified foreign-key consistency
DATA TRANSFORMATION	created analysis-ready datasets for sales, products, customers, inventory, and campaigns
KPI ENGINEERING	calculated GMV, AOV, Gross Margin, Sell-through, ROAS, CAC, Conversion Rate, and customer metrics
CUSTOMER SEGMENTATION	built RFM-based customer groups and repeat-purchase measures
SYNTHETIC EXTENSION	generated campaign spend and funnel data using original campaign IDs, channels, and periods
BI MODELLING	connected prepared datasets to Looker Studio for interactive analysis

ALL-TIME CUSTOMER SUMMARY

INSIGHTS

SALES PERFORMANCE

GROWTH IS STRONG - BUT MARGIN IS SLIPPING

- Revenue is up +55% and orders +59% — but average order value fell **-2.5%** and margin dropped **-6.5%**
- When units grow faster than revenue and both AOV and margin fall, that's the signature of discount-led growth — brand is selling more, but cheaper, and giving up margin to do it
- Geographically, Germany is the biggest market at nearly \$31k, three times Portugal at \$10k

INSIGHTS

PRODUCT & INVENTORY

	Size ▾	Stock Quantity	Cost Price	Sell-through %
1.	XS	3,049	\$9,065.15	32.6%
2.	XL	2,354	\$6,820.07	30.33%
3.	S	2,511	\$6,592.31	30.25%
4.	M	2,330	\$5,996.36	29.22%
5.	L	2,630	\$6,581.65	28.82%
6.	40	396	\$1,591.7	36.64%
7.	38	744	\$1,913.45	26.48%
8.	36	574	\$2,043.9	34.62%
9.	35	624	\$1,640.51	32.32%

BRAND IS SITTING ON OVERSTOCK

- Estimated sell-through is **30.6%**. For context, a healthy fashion sell-through sits between 60 and 80%, and anything **below 40%** is the industry's overstock warning line (Toolio and Shopify)
- Medium and Large were **over-bought**, all selling through in the high 20s to low 30s. Size 38 is the worst at 26%. Brand bought too deep in the middle of the size curve
- Pants earns the highest margin (44.7%) and lowest revenue (\$24k) precisely because it might be least-discounted, least-overstocked category

INSIGHTS

CAMPAIGN PERFORMANCE

DEEPER DISCOUNTS DON'T PERFORM BETTER THAN SMALL ONES

- ROAS by Campaign: June Price Drop (10% off) is the BEST at 12.59 and its CAC is the lowest at \$37.62, while the deep-discount campaigns — TIVA Week and Mid-Season Clearance (both 30% off) — sit at 12.55 / 12.20. **Deep discounts do not win** on efficiency
- Marketing Funnel: Sessions 2.32% → Add to Cart 0.28% — an **~88% drop**

	Campaign	Country	Channel	Discount	Spend	Revenue	ROAS ▾	CAC
1.	Mother's Day Campaign	Italy	Email	25%	\$358.53	\$5,867.93	16.37	\$32.59
2.	June Price Drop	France	Website Banner	10%	\$378.99	\$5,822.14	15.36	\$37.9
3.	Early Summer Deals	Spain	Email	12%	\$192.36	\$2,936.26	15.26	\$24.05
4.	Easter Promotion	Italy	Social Media	10%	\$426.85	\$6,411.7	15.02	\$38.8
5.	June Price Drop	Portugal	Website Banner	10%	\$301.02	\$4,382.67	14.56	\$33.45

INSIGHTS

CUSTOMER & MARKET

A THIRD OF REVENUE SITS IN CUSTOMERS WHO ARE SLIPPING AWAY

- RFM value concentration: VIP = 120 customers, \$945 avg value, \$113.45k revenue (~35% of all revenue from ~21% of buyers). **At-Risk 108 (\$582) + Lost 123 (\$353) = ~\$106k, about a third of revenue**
- At-Risk group is our second most valuable segment, so it's high-value customers who are drifting
- Loyalty is wildly uneven by market: Italy retains at nearly 48%, while Germany — our biggest market — is the worst at 37% and has the lowest customer value

STRATEGIC RECOMMENDATIONS

DISCIPLINE THE DISCOUNT

Cap standard promotions at 10–15%; reserve 25–30% strictly for genuine end-of-life clearance. Redirect the saved margin into value-adds — **free-shipping thresholds, gift-with-purchase, early access to drops** — which lift orders without training customers to wait for sales. Track a discount-dependency ratio (discounted revenue ÷ total) and hold it under 25%

REBALANCE MARKET INVESTMENT

Run a two-track market strategy. In Germany, stop pouring acquisition discounts into a leaky bucket — pivot budget to retention (second-purchase triggers, post-purchase flows). In Portugal, Italy and the Netherlands, increase acquisition — these markets turn buyers into repeat, high-value customers, so the CAC is justified.

STAND UP A RETENTION & LOYALTY ENGINE

- (a) A structured 3-email win-back sequence for At-Risk/Lost.
- (b) A tiered VIP/loyalty program — points, early access, member pricing instead of blanket discounts.
- (c) A second-purchase nudge for the 34% who are New, since first-to-second order is the hardest, highest-leverage step
